

## TRANSFER ROBOT ON PRESSES

This set, made of several synchronized robots, automatically load cutting and stamping presses. These robots ensure the gripping of flanks, the possible reversal and products depositing from press to press, at a sustained rate. The versatility of the robots gives a great ability to adapt to different sizes of parts.

### TECHNICAL FEATURES:

- Synchronized robots for automatic loading of cutting and stamping presses.
- Picking up, turning over and product depositing
- Multi-format products
- User-friendly and intuitive interface for setting up the robot

Application example, photo above:

- Dimensions of the sheets:
  - Length: 80 to 300 mm
  - Width: 80 to 200 mm
- Weight of metal sheets: 1kg
- Production rate: 700 products/hour
